XML Optimization
Native, automatic and transparent

For MS Office DOCX, PPTX and XLSX attached files and Open Office ODT, ODP and ODS attached files. 20% to 80% volume reduction on XML files (indicative global reduction ratio: 50%). The optimized files remain XML files.

Picture Optimization
Native, automatic and transparent

For attached picture files (JPG, BMP, PNG, GIF, TIF, EMF and WMF). 20% to 95% volume reduction on picture files (indicative global reduction ratio: 50%). The optimized files remain picture files.

Zip Compression
Automatic and transparent

For all attached files that are not candidates for native optimization. 20% to 95% volume reduction (indicative global reduction ratio: 50%). Includes transparent Zip decompression.

Volume reduction and volume avoidance policies

Support of policies to prevent, for instance, the attachment of files exceeding a given size, or the attachment of given file types or to automatically resize attached pictures exceeding given dimensions.

PDF Conversion

On demand, single-click and on-the-fly PDF conversion for iNotes attached files.

Password-Based Encryption

On demand, single-click and on-the-fly password-based encryption for iNotes attached files (including standard Zip and AES Zip encryption).

Statistics Dashboards

Local (user-based) and centralized (organization based) statistics dashboards to display and analyze the volume savings delivered by ZipMail.
