For Skype

With a unique set of very powerful volume reduction features, full transparency, low resource footprint, ease of deployment and support, Z-OptimiZr is a unique and unchallenged fully integrated optimization and acceleration solution for Skype for Business.

Thanks to Z-OptimiZr, Skype for Business operates faster while consuming less network and storage resources.

XML Optimization
Native, automatic and transparent

For MS Office DOCX, PPTX, XLSX etc. files and Open Office ODT, ODP and ODS files sent via Skype. 20% to 80% volume reduction on XML files (indicative global reduction ratio: 50%). The optimized files remain XML files.

Picture Optimization
Native, automatic and transparent

For picture files (JPG, BMP, PNG, GIF, TIF etc.) sent via Skype. 20% to 95% volume reduction on picture files (indicative global reduction ratio: 50%). The optimized files remain picture files.

Zip Compression & Decompression
Automatic and transparent

For files sent via Skype that are not candidates for native optimization. 20% to 95% volume reduction (indicative global reduction ratio: 50%).

Volume reduction and volume avoidance policies

Support of policies to prevent, for instance, sending files exceeding a given size or files of given file types, or to automatically resize pictures exceeding given dimensions in large image files.

PDF Conversion

On demand, single-click and on-the-fly PDF conversion for files sent via Skype.

Password-Based Encryption

On demand, single-click and on-the-fly password-based encryption for files sent via Skype (including standard Zip and AES 256 Zip encryption).

Statistics Dashboards

Statistics dashboards to display and analyze the volume savings delivered by Z-OptimiZr for Skype.
