Client V12
For IBM Verse

With a unique set of very powerful volume reduction features, full transparency, low resource footprint, ease of deployment and support, Z-OptimiZr is a unique and unchallenged optimization and acceleration solution for IBM Verse. Available for Microsoft Internet Explorer, Microsoft Edge, and Google Chrome.

What our customers say:

The migration of our messaging system to the Cloud put our network links under high pressure. By drastically reducing our network bandwidth needs, Z-OptimiZr helped us solving this critical issue.

The XML file (DOCX, PPTX and XLSX files) and picture file (JPG, BMP, PNG etc.) native optimization features deliver volume reduction ratios over 50%, and this with 100% transparency for the recipients, since the optimized attached files remain in their original format!

It is also great that the files to attach can be instantly converted to PDF on demand, in a single click!

The optional attached file password-based encryption, including the support of the strong AES 256 encryption, is also a key feature for us when sending confidential documents by email to our customers.

XML Optimization
Native, automatic and transparent
For MS Office DOCX, PPTX and XLSX attached files and Open Office ODT, ODP and ODS attached files. 20% to 80% volume reduction on XML files (indicative global reduction ratio: 50%). The optimized files remain XML files.

Picture Optimization
Native, automatic and transparent
For attached picture files (JPG, BMP, PNG, GIF, TIF, EMF and WMF). 20% to 95% volume reduction on picture files (indicative global reduction ratio: 50%). The optimized files remain picture files.

Zip Compression
Automatic and transparent
For all attached files that are not candidates for native optimization. 20% to 95% volume reduction on these files (indicative global reduction ratio: 50%). (included transparent Zip decompression)

Volume reduction and volume avoidance policies
Support of policies to prevent, for instance, the attachment of files exceeding a given size, or the attachment of given file types or to automatically resize attached pictures exceeding given dimensions.

PDF Conversion
On demand, single-click and on-the-fly PDF conversion for Verse attached files.

Password-Based Encryption
On demand, single-click and on-the-fly password-based encryption for Verse attached files (including standard Zip and AES Zip encryption).

Statistics Dashboards
Local (user-based) and centralized (organization based) statistics dashboards to display and analyze the volume savings delivered by Z-OptimiZr.
