Client V12 For IBM Notes

With a unique set of very powerful volume reduction features, full transparency, low resource footprint, ease of deployment and support, ZipMail is a unique and unchallenged optimization and acceleration solution for IBM Notes.

What our customers say:

This incredible software saved us literally dozens of terabytes in the last years, reducing our needs for Domino storage and network bandwidth by more than 50%.

Now, with the new XML file (DOCX, PPTX and XLSX files) and picture file (JPG, BMP, PNG etc.) native optimization features, the volume savings are still better than before, and this with 100% transparency for the recipients, since the optimized attached files remain in their original format!

It is also great that the files to attach can be instantly converted to PDF on demand, in a single click!

The optional attached file password-based encryption, including the support of the strong AES 256 encryption, is also a key feature for us when sending confidential documents by email to our customers.

XML Optimization

Native, automatic and transparent

For MS Office DOCX, PPTX and XLSX attached files and Open Office ODT, ODP and ODS attached files. 20% to 80% volume reduction on XML files (indicative global reduction ratio: 50%). The optimized files remain XML files.

Picture Optimization

Native, automatic and transparent

For attached picture files (JPG, BMP, PNG, GIF, TIF, EMF and WMF), including the optimization of clipboard images pasted into Notes emails and documents (with ZipMap). 20% to 95% volume reduction on picture files (indicative global reduction ratio: 50%). The optimized files remain picture files.

Zip Compression

Automatic and transparent

For all attached files that are not candidates for native optimization. 20% to 95% volume reduction (indicative global reduction ratio: 50%). Includes transparent Zip decompression.

Volume reduction and volume avoidance policies

Support of policies to prevent, for instance, the attachment of files exceeding a given size, or the attachment of given file types or to automatically resize attached pictures exceeding given dimensions.

PDF Conversion

On demand, single-click and on-the-fly PDF conversion for Notes attached files.

Password-Based Encryption

On demand, single-click and on-the-fly password-based encryption for Notes attached files (including standard Zip and AES Zip encryption).

Statistics Dashboards

Local (user-based) and centralized (organization based) statistics dashboards to display and analyze the volume savings delivered by ZipMail.

ZipMail Client V12 Summary

Innovative and Powerful New Features

ZipMail V12 delivers, with its new XML and picture volume optimization features, new innovative, powerful and 100% transparent volume reduction opportunities to all IBM Notes organizations.

With its new single-click PDF conversion feature, ZipMail V12 enables all IBM Notes users to drastically improve their IBM Notes usage in terms of attached files sent for read-only purposes.

With its single-click attached file encryption feature, ZipMail V12 also provides a simple and efficient way to password-protect and encrypt your Notes attached files.

Outstanding Volume Reduction Results

With its new astounding and unique abilities to reduce the volume of the attached Microsoft Office XML (DOCX, PPTX and XLSX) files and of the attached picture files (JPG, GIF, PNG...), while keeping them in their native formats, ZipMail V12 for IBM Notes achieves unbelievable email volume reduction results never seen before, while remaining fully transparent to the Notes users.

Total transparency also applies to the recipients of the optimized files since the optimized files remain in their native format.

Fully configurable, transparent and easy to deploy

The hallmarks of ZipMail Client for IBM Notes (its legendary small footprint, high level of configurability, deployment ease and usage transparency), that have made for its great success at so many customers across the years, are fully preserved in ZipMail V12.

ZipMail V12 remains a simple IBM Notes add-in software that can be automatically deployed at even the largest customers, using MSI packages specifically built for enterprise-wide deployment.

For existing customers, ZipMail V12 ascending compatibility with the previous versions of ZipMail guarantees a smooth migration of your user base.

Legendary Tech Support

Legendary ZipMail tech support is managed by the same team since 1995. It remains unbeaten in terms of quality, response times and customer respect.

The ZipMail yearly support contract provides enterprise central IT with unlimited email and phone support, for product usage, product setup and product deployment.

It also includes setup package customization as well as all updates and new minor and major versions of the product.

See for Yourself!

Download your fully functional ZipMail Client for IBM Notes evaluation copy right now:

And please don't hesitate to contact us with any questions about ZipMail, we are always most pleased to answer.

ZipMail is also available for IBM iNotes, IBM Verse and IBM Connections (an add-on to Microsoft Internet Explorer, Edge and Google Chrome). The ZipMail optimization and compression features can also be executed on the IBM Domino servers using ZipMail Real Time for Domino to optimize and compress the files attached to the emails routed by the Domino servers in real time and ZipMail for Domino Databases to optimize and compress the files attached to the emails and documents already stored in the existing NSF databases.

We also have ZipMail client and server versions and other optimization and acceleration solutions dedicated to the Microsoft Outlook, Exchange, SharePoint, OneDrive and Lync platforms.
