What our customers say:

This incredible software saved us literally hundreds of terabytes in the last years, reducing our needs for MS Exchange storage and network bandwidth by more than 50%.

The Z-OptimiZr XML file (DOCX, PPTX, XLSX etc.) and picture file (JPG, BMP, PNG etc.) native optimization features deliver impressive volume savings with 100% transparency for the recipients, since the optimized attached files remain in their original format!

It is also great that the files to attach can be instantly converted to PDF on demand, in a single click!

The optional attached file password based encryption, including the support of the strong AES 256 encryption, is a key feature for us when sending confidential documents by email to our customers.

For Microsoft Outlook

With a unique set of very powerful volume reduction features, full transparency, low resource footprint, ease of deployment and support, ZipMail is a unique and unchallenged fully integrated optimization and acceleration solution for Microsoft Outlook.

XML File Optimization

Native, automatic and transparent

For MS Office DOCX, PPTX and XLSX attached files and Open Office ODT, ODP and ODS attached files. 20% to 80% volume reduction on XML files (indicative global reduction ratio: 50%). The optimized files remain XML files.

Picture File Optimization

Native, automatic and transparent

For attached picture files (JPG, BMP, PNG, GIF, TIF, EMF and WMF). 20% to 95% volume reduction on picture files (indicative global reduction ratio: 50%). The optimized files remain picture files.

Pasted Picture Optimization

Native, automatic and transparent

For pictures pasted into Microsoft Outlook emails. 20% to 95% volume reduction (indicative global reduction ratio: 50%).

Zip Compression & Decompression

Automatic and transparent

For attached files that are not candidates for native optimization. 20% to 95% volume reduction (indicative global reduction ratio: 50%).

Volume reduction policies

Support of policies to prevent, for instance, the attachment of files exceeding a given size or the attachment of given file types, or to automatically reduce the size of attached or copied and pasted pictures exceeding given dimensions.

PDF Conversion

On demand, single-click and on-the-fly PDF conversion for Microsoft OWA attached files.

Password-Based Encryption

On demand, single-click and on-the-fly password-based encryption for OWA attached files (including standard Zip and AES Zip encryption).

Statistics Dashboards

Statistics dashboards to display and analyze the volume savings delivered by ZipMail.
