Client V12 For Google Gmail

What our customers say:

The migration of our messaging system to Google put our network links under high pressure.

By drastically reducing our network bandwidth needs, ZipMail helped us solving this critical issue.

The XML file (DOCX, PPTX and XLSX files) and picture file (JPG, BMP, PNG etc.) native optimization features deliver volume reduction ratios over 50%, and this with 100% transparency for the recipients, since the optimized attached files remain in their original format!

It is also great that the files to attach can be instantly converted to PDF on demand, in a single click!

The optional attached file password-based encryption, including the support of the strong AES 256 encryption, is also a key feature for us when sending confidential documents by email to our customers.

With a unique set of very powerful volume reduction features, full transparency, low resource footprint, ease of deployment and support, Z-OptimiZr is a unique and unchallenged optimization and acceleration solution for Gmail. Available for Google Chrome, Microsoft Internet Explorer, Microsoft Edge.

XML Optimization

Native, automatic and transparent

For MS Office DOCX, PPTX and XLSX attached files and Open Office ODT, ODP and ODS attached files. 20% to 80% volume reduction on XML files (indicative global reduction ratio: 50%). The optimized files remain XML files.

Picture Optimization

Native, automatic and transparent

For attached picture files (JPG, BMP, PNG, GIF, TIF, EMF and WMF). 20% to 95% volume reduction on picture files (indicative global reduction ratio: 50%). The optimized files remain picture files.

Zip Compression

Automatic and transparent

For all attached files that are not candidates for native optimization. 20% to 95% volume reduction on these files (indicative global reduction ratio: 50%). (included transparent Zip decompression)

Volume reduction and volume avoidance policies

Support of policies to prevent, for instance, the attachment of files exceeding a given size, or the attachment of given file types or to automatically resize attached pictures exceeding given dimensions.

PDF Conversion

On demand, single-click and on-the-fly PDF conversion for Gmail attached files.

Password-Based Encryption

On demand, single-click and on-the-fly password-based encryption for Gmail attached files (including standard Zip and AES Zip encryption).

Statistics Dashboards

Local (user-based) and centralized (organization based) statistics dashboards to display and analyze the volume savings delivered by ZipMail.
